

The Power Dual

Enjoy the Ultimate in Hydrotherapy in the Safety of a Walk-In Tub

Water jets low down in front for reflexology benefit for feet bottoms Water and air jets positioned to stimulate the thighs, calves, and back of knees Water jets in a "V" configuration for optimal coverage of the back and neck When bather is reclined, water jets provide a massaging cushion of pressure for the upper back.

26 Total jets configured for optimal hydrotherapy benefit! 10 Adjustable Water Jets + 16 Air Jets

I am greatly impressed with the new 'Power' walk-in tub from Bliss. I didn't want to get out of it. I felt like I was getting a true massage. As with a physical therapist's massage, I could feel immediately a favorable increase in my body's blood circulation and stimulation of my lymphatic system. The bathing experience is phenomenal.
